

SPECIALISTS IN CRYOGENIC EQUIPMENT

FlavourDoser

An all stainless steel doser designed to dose precisely according to line speed with PLC programming

All Dosers come with Cryogas's renowned customer service, from conceptual design to implementation, and are backed by a one year warranty.

Flavor Doser

Dosing systems are primarily used to pressurize and/or inert products and its packaging. As new packaging technologies and products evolve, so has demand for refined dosing results. Fluid is supplied to doser by a hose and flows into the dosing head. A sensor detects the speed of the line (encoder compatible for higher speeds), and a second sensor detects the container presence. When a container is detected, the dosing head actuated valve opens and dispenses the exact amount of fluid. A PLC (Programmable Logic Controller) is the brains behind integrating the sensors, controls and human interface via a touch screen display

Typical Applications

-
-

Features and Benefits

- urvovoovvou
- VProvvLP
- Discrete Dosing - up to 2000 containers per minute
- Remote Dosing - monitor and troubleshoot system remotely thereby minimizing or eliminating system downtime

Vent Heater Specifications

Voltage

- 110 VAC
- 220 VAC

Power Connection

- Standard grounded plug
- Hard wired

Current

- 3 Amps
